- Material which has neither definite shape nor definite volume, is easily compressible and has no free surface is called gas.
- Metals are elements that are hard and shiny in appearance. Some metals used in our daily life are iron, copper, gold, silver, etc. Metals conduct heat and electricity.
- Elements that generally do not shine, that are neither too hard nor too soft are non-metals. All gases are non-metals. Some non-metals are sulphur, carbon, oxygen etc.
- Elements which have the properties of metal and non-metals are called metalloids. Some examples are arsenic, germanium etc.
- On being hit, metals produce a typical sound. They are said to be sonorous.This property is being made used in making temple bells.
- The easiest way to represent the element and to write the chemical formula is using symbols.

A-Z GLOSSARY

Disinfectant	Chemical substance which kills or prevents the disease causing microorganism.
Semiconductor	Substance which acts as bad conductor at low temperature and as good conductor at high temperature.
Reducing agent	Substance which undergoes oxidation reaction.
Carbohydrate	Compound which contains carbon, hydrogen and oxygen.
Bleaching agent	Substance which is used to remove the colour.
Preservative	Substance which prevents food being spoiled by microorganism.

TEXTBOOK EXERCISE

LFU86

I. Choose the best answer.

1. The liquid metal used in thermometers is

   a) copper b) mercury c) silver d) gold

2. The pictorial symbol for water given by the alchemists was

   a) △ b) ▽ c) ▽ d) △

3. Which one of the following element name is not derived from planet?

   a) Plutonium b) Neptunium
   c) Uranium d) Mercury

4. Symbol of mercury is

   a) Ag b) Hg c) Au d) Pb

5. A form of non-metal which has high ductility is

   a) nitrogen b) oxygen
   c) chlorine d) carbon

6. The property which allows the metals to be hammered into their sheets is _____

   a) ductility b) malleability
   c) conductivity d) shining strength

7. The non-metal which conducts electric current is

   a) carbon b) oxygen
   c) aluminium d) sulphur
